[haskell lake petroleum contamination site picture 3.11.2016.jpg](#)

Good Morning Matt,

Attached is a picture of the site from this morning.

Snow is melting fast here. Winter and spring are fighting. Sap is running. Road limits went on yesterday. There is always a chance for a March snowstorm dump. If it happens, it usually melts within a couple days.

Kristen

Subject: Snow?

Hi Kristen,

I hope Bob was able to answer your question about the work plan. We will have it done before we mobilize but time will be tight.

If you don't mind, I was hoping you could give me an update about how much snow is on the ground down that way? I've been looking for webcams but not having much luck!

Just wondering whether we're going to need to arrange to have the lot plowed before we start drilling.

Thank you for any intel,

--Matt
